The diagram shows a 70094 14C8 decoder (J134) with its output pins (8-14) connected to a 2-wire fan (FAN2\_PWR). The fan is represented by a 2-wire symbol. The decoder's output pins are connected to a series of capacitors (C2500-C2511) and a 12V busbar (P12V\_BUSBAR). The capacitors are connected in a chain, with the final output connected to the fan. The 12V busbar is connected to the fan's ground.
